- 5.4.1 In order to allow as varied a selection of cars to compete, the Technical Requirements will be kept as simple as possible but will be subject to Motorsport UK Section Q Technical Regulations. Only period modifications will be permitted to any component unless clearly stated in these regulations. All cars must be fitted with a transponder (see Regulation 2.10.).
- 5.4.2 All entrants in classes A,B,D,E and G must complete a Technical Identity Form (TIF) which is in the appendix of these regulations. Drivers who fail to present an up to date TIF at scrutineering may be penalised.
- 5.4.3 **Deleted.**
- 5.4.4 Prior to competing in the 2023 Scottish Classic Sports & Saloon Championship the vehicle must undergo a Safety Scrutineering inspection which will be undertaken by the SMRC Chief Scrutineer, Championship Eligibility Scrutineer or their appointed deputies, unless the vehicle competed in the same condition in the 2022 Championship. Additionally all vehicles must undergo a Safety Scrutineering inspection at least every 4 events. Any vehicle involved in an accident, or having been modified in any way, should be represented to the Scrutineers for further examination (Motorsport UK General Regulation J.3.1.2). A record of inspections will be maintained by the Championship Organisers. Scrutineering self-declaration forms must be lodged with the Event Organisers a minimum of 3 days prior to every event. The Event Organisers may select cars for pre-event safety inspections, the method of selection and times/locations for inspection will be notified in the event SRs. This regulation forms part of the Motorsport UK approved Scrutineering trial and may be amended at any time.

## 5.5 CHASSIS:

As manufactured if unitary construction. Cars manufactured with separate chassis may use an alternative (eg Lotus Elan with Spyder Chassis) as long as the original style and material is adhered to, and that the original suspension type, engine and transmission locations are maintained.

## 5.6 BODYWORK:

5.6.1 On the exterior, no modifications from the standard car other than as detailed in 5.6.2.

5.6.2 Otherwise, bodywork to be of standard shape and dimensions with an allowance of 2 inches per side for wheel arch extensions. Peripheral panels of different materials are permitted primarily for Bonnet, Boot, and Front Wings, but Kevlar and carbon fibre items are prohibited. 5.6.3 Deleted.

5.6.4 Deleted.

5.6.5 Floor carpets, passenger compartment heater, passenger seat(s) and spare wheel and tools may be removed in the interests of safety. Replacement of the original seat with an FIA standard competition seat is strongly recommended.

5.6.5.1 Deleted.

5.6.6 All cars must have had provision for a front passenger seat to have been fitted when originally built.

## 5.7 ENGINE:

5.7.1 The engine cylinder head and block must be based on the normal production parts and materials as used when the car was manufactured. In the event that an exact original item is unavailable, an alternative may be used, provided that the Eligibility Scrutineer and Championship Co-ordinator are satisfied as to the necessity of the change. The number of ports in the cylinder head must remain as originally manufactured.

5.7.1.1 Deleted.

5.7.2 Engines may be rebored up to a maximum of + 0.060" without changing class even if the capacity exceeds the upper limit by the rebore. Where a competitor wishes to exceed the permitted overbore of +0.060" and this raises the engine's capacity above the class limit, the car will be included in the higher capacity class. The crankshaft and associated connecting rods material is free. Multivalve cylinder heads are not permitted unless originally fitted as standard. Engine disposition and location must remain as standard and therefore no modifications to the base structure or chassis are allowed.

Cars with carburettors as original equipment must retain carburation. Fitting injection of any type in place of the carburettors is not permitted. If the competitor wishes to retain injection, it must be of the type fitted as standard by the vehicle manufacturer and either of the original manufacture or to the original specification, method of operation, management and number and type of injectors.
- 5.7.6.1 Manifolds and carburettors are free.
- 5.7.6.2 Superchargers and turbochargers are only permitted if fitted as a standard factory item in period. In this case the engine capacity will be multiplied by a factor of 1.7 to give the capacity of the supercharged or turbocharged engine. Only the original type and size of turbo/super charger may be used, and only the original period method of boost control will be permitted. The Eligibility Scrutineer will measure and seal any such installation if necessary.
- 5.7.6.3 Fuel injection is not permitted in Class G.
- 5.7.6.4 Rotary engines – Only permitted if fitted as a standard factory engine. Engine capacity determined by multiplying the capacity by 1.5 if naturally aspirated or 2.1 if the engine is turbo charged.
- 5.7.7 Deleted.
- 5.7.8 Deleted.
- 5.7.9 Deleted.
- 5.7.10 Deleted.

- 5.7.12 Deleted.
- 5.7.13 Deleted.

5.7.14 Engines may be sealed under the direction of the Eligibility Scrutineer or their nominated agent at any time during the season and for the duration of the season. Seals must not be broken under any circumstances. If seals are broken the engine will be ineligible unless a full internal inspection is carried out by the Organisers or their nominated agent. The inspection will be at the competitors cost. Additional Motorsport UK seals may be fitted to engines at anytime. It is strictly forbidden for a competitor or his agent to remove or tamper with Motorsport UK seals. Should these seals be damaged or removed for whatever reason except under the direction of the Eligibility Scrutineer the car must not be used in competition or practice until the Eligibility Scrutineer has inspected the engine and refitted the correct seals. The Eligibility Scrutineer may require that the engine be removed and taken to an approved venue to be dismantled for inspection and the cost of this, and subsequent rebuild, will be borne by the competitor. All instances of broken seals will be logged and reported to the Clerk of the Course / Championship Organisers.

## 5.8 **SUSPENSION:**

5.8.1 Period modifications are permitted providing the original production layout of either live axle or independent suspension is retained. Anti roll bars are free and mounting bushes may be changed. Spherical bearing joints and rod ends are permitted.
