All persons involved in the 2025 ecoRally Scotland are required to demonstrate their strong commitment to environmental protection by avoiding acts or omissions which would in any way disrupt or contaminate the surrounding areas or generate unnecessary noise or waste.

Precautions to be taken include the following:

Any breach of the following shall be reported to the CoC in a written report.

- Consider, and reduce, the environmental impact when involved in 2025 ecoRally Scotland before, during and after the event. This also includes ancillary activities.
- Use eco-labelled products in all activities, if possible.
- Before taking part, plan how to act to prevent environmental accidents.
- Organisers, marshals and participants should not throw away or leave on site any objects or materials, such as bottles, metal, plastic packaging materials, leftover food, spare tyres, old spares, etc., along the entire itinerary of the event. The general rule is the obligation to leave the spaces used cleaner than they were upon arrival.
- Avoid making unnecessary noise by sudden acceleration or hard braking or by using the horn of the car unnecessarily.
- The pollution of the spaces from liquids of any kind, such as oils, fuels, etc. when refuelling and during any vehicle repairs, is strictly prohibited.
- All vehicles should adhere strictly to the legislation regarding noise standards in force in the country of the event.
- The personnel manning the time controls or Passage Control stations should have a sufficient number of waste collection bags and, on their departure from the point of operation, should not leave behind any object or material used for the execution of their duties, such as labelling strips, plates, all kinds of auxiliary materials, and food waste and packaging.
- In the Regrouping Areas, particular attention should be paid to maintaining the cleanliness of the space and collecting rubbish. In these spaces specifically, the rule of leaving the spaces used cleaner than they were upon arrival should be strictly applied.
- Any environmentally harmful liquids or fuels that may have leaked during the refuelling and repair of the vehicles must be collected in a suitable container and the polluted space cleaned with care.
- Waste separation is mandatory.

As part of the **Scottish Motor Racing Club's** commitment to the provisions of Art. 4 of the 2025 Bridgestone FIA ecoRally Cup Sporting Regulations, for the protection of the natural environment, the entire event carbon footprint (CO<sub>2</sub>e) of the **2025 ecoRally Scotland**, will be offset using local **Woodland Carbon Code certified** carbon offsetting **rewilding projects based at Loch Ness**.
